

February 2013

Kathryn Winn Board Report

Our goal and mission is to give your child the “Best education in the nation.”

Interventions

Since January, our students in the very bottom tier have been tested; placed and groups are up and running for approximately 9 hours. (We need to have 80-120 hours of LMBell instruction by May.)

Courtney, our Lindamood -Bell coach, has been wonderful. She is writing teachers LMB lesson plans (part of her job) and adjusting instruction on a daily basis. She paces instruction in order to make the correct instructional changes. We are already seeing great changes in student's learning.

We have been progressing monitoring, our students, and looking at the data very frequently in order to make changes to instruction.

Teachers have been working extremely hard in order to get our students to level.

Professional Development

We are having PLC's after school on Thursday's in order to learn LMBell program and to make sure teachers are doing each step correctly. The pacing is one of the most important pieces of the instruction.

As you can tell we have been very busy. We are so thankful for this opportunity you have given us.
