

Magnetic door locks have been ordered for Cartmell front entrance to aid in securing our buildings. Some work has been done on the track area to get ready for spring track. The locker rooms at High School now have the floor ground and cleaned so the new finish can be put down when basketball is done. That will be the final step on the project. The filter change is complete to go through the remainder of the school year. We are now addressing inspection checklists that are sent from each building monthly along with the regular work orders sent daily to aid in any safety issues that may be missed. The baseball bleachers have been taken from the football field and set back in place for spring ball. We are now making plans for summer projects which will be here soon. Work orders are addressed daily to try to see to all needs in the district.
