

The football field is taking shape after the new dirt last year and seeding this spring. Banners have been hung, signs put up and things moved to make ready for the end of year festivities. The bike rack at high school received some modifications and has been reinstalled. There have been some pipe joint leak issues on the geothermal system and we have addressed them as they arise with success. We have added a bit of lawn care to our list with the two new court yards at Head Start. We are preparing the A.T.C. rooms for the new location for PLTW lab and classroom by opening a wall and installing two large windows. The new floor tile and supplies to be installed at Winn is on site and ready for install this summer which includes five classrooms and the cafeteria. Plans are made for the new weather siren to be installed on the High School campus. Our filter stock is on order for the following year's changes. We are addressing work orders daily and things are running smooth.

Thank You for your Support,

Dwayne A. Smith
