

Approval of the Triad Agreement

TRIAD will be providing schools based clinics. They will use existing space in the HS and MS to set up and see students and staff as needed. They can provide prescriptions electronically for both students and staff which would cut down on the number of absences. TRIAD will provide sport physicals at a reduced price for our athletes. They will direct bill the patients for their services. All services provided are billed on a sliding scale based on ability to pay and insurance plans. There is no cost to the school district.
