Equity Reviews:

This month we have been reviewing all stipend positions and the number of extended days for certified employees. I will do a presentation of our findings and our proposed changes for your review during the meeting. A couple of things we review were as follows: 1) The number of extended days should equal the number of days that are required to do the job; 2) The stipend should reflect the level of responsibility for the position. This the framework we used as we evaluated each position individually to ensure both EQUITY AND QUALITY. Next month we will be reviewing the classified positions.
