

Elementary Supervisor of Instruction
Board Report
June 2018

Head Start Focus Reviews:

We made it through both reviews and we feel really good about the things they observed. We will receive a full detailed report soon outlining the strengths and areas for improvement.

K Prep:

Assessment went very well in all buildings thanks to the diligent work of our building assessment coordinators. They worked very hard to make sure all protocols were followed. The boxes have been shipped back and we expect to receive results by September.

End of the Year Reports:

All of our district reports have been submitted. We collect data all year long and then have to submit reports so our programs can be evaluated for effectiveness.

Kids Read Now:

The reading kick-off events went well in both elementary schools. The students received a bag with 3 books and information about the program that night. The next book will be mailed to their houses on July 4th. We are excited to involve our students and parents in helping to prevent summer slide in literacy.

Summer Enrichment Opportunity:

We are currently planning a summer enrichment opportunity for elementary students that involves educational trips and outdoor adventures to build their background knowledge in a variety of areas. This will take place July 16-27 at Cartmell Elementary. Kathryn Winn and Cartmell students will be able to sign up to attend.

And that's a wrap...

It feels good to wrap up another successful year and begin preparing for the next one.
