

Approval of hour increase for Food Service positions

I would like to propose that we increase all 4-hour positions in the Nutrition Department to 6-hour positions starting in the 2018-19 SY. We have six positions that at this time are four (4) hour positions. I believe by doing this, it will increase the amount of interest among applicants. I also think that it will reduce turnover in the department. This increase in hours would help the daily routine of the kitchens. It will provide a more useful schedule to each kitchen. The approximate cost for this increase would be around \$30,000/year funded by the Food Service program. Based on conversations with the kitchen managers, I support this increase and I think it is justified. I would like to recommend it at this time.
