

## September 2019 Technology Board Report

---

### Projects completed:

- The new look for our website is now live. Cindy is working with the schools to reorganize their site and make it more “community/family” friendly.
- We (Coaches Cindy Johann and Zachary Morris-Dean) now have 17 students with the potential of 2 more girls on the Esports team. We are shooting for 2 League of Legends teams and 3 Rocket League teams.

### Benefits from an Esports team at Carroll County:

- Teamwork
- Communication
- Better grades for some of our students
- Decision making
- Hand, eye coordination
- Active participation for some who have never been on a team
- Interpersonal skills
- Healthy computer habits
- Forming relationships with a wonderful variety of students
- A new potential for college scholarships
- Our district storage array was limited in space and we upgraded so we could hold data such as: backups, district applications that run on the array, and file storage.
- Intercom is put in a Winn
- Gathered Surplus from all buildings for a pickup.

---

**542** district tickets completed not including student tickets!
