

SPECIAL EDUCATION DEPARTMENT

SWAP Note to work with Applied Behavioral Advancements

The Special Education Department is requesting the permission to work with Applied Behavioral Advancements. A company that provides therapists that do Applied Behavior Analysis (ABA) therapy for students with autism. They will be providing two different types of services, developing service plans for individual students with Autism. They will also be working with staff and teaching them methods for working with students with Autism. Our hope is to start this work for our students in October.
