

# *Approval of the Dataseam Agreement*

Dataseam is a company that partners with UofL cancer hospital to provide affordable technology for schools. During off hours, the computers perform cancer research for UofL.

Signing this contract will send Zach Morris-Dean to 6 days of training on MacOS, the system the machines run. In return, Dataseam will provide the district 50 iMacs to use as we please, provided they stay online at night for cancer research.
