

February 2020 Technology Board Report

District Copiers

Zach has worked very hard to get all copiers up and running without staff having to log in. He has worked with Toshiba almost 2 weeks non-stop, learning and implementing.

CCATC:

Taking older teacher stations, updating mechanical drive for a solid-state drive, imaging and creating a lab for testing.

Technology is giving training for teachers on Feb. 17th to answer their technology questions and to show them a few things they may not know what to ask about.

Kentucky Society for Technology in Education

I have been nominated and elected for the Region 4 Representative. This means I do a lot of work for the Fall virtual state conference for District Chief Information officers/District Technology Coordinators, technical staff, and some instructional staff and the KySTE state convention in the spring with emphasis on STEM, Leadership, Teachers, Tech and Coaches. This is my third term of being elected. We do give awards to the best tech support in the state, the best teacher who leads in technology, the best leader in the state who supports and leads in technology integration. We also give money for STLP scholarships and the 3 top showcase state winners and engineers to go to the international ISTE conference. KySTE give grants each year to several school districts with the best applications for future use of technology in their district. We give based on vendor partnership money. Carroll County has benefited from these funds in almost every way.

CCHS

Helped to prepare older laptops for MAP Testing

171 district tickets completed.

29 High School student tickets
