

**Supervisor of Instruction
Board Report
January 2021**

CDIP Update: All documents and diagnostics have been submitted. Documents that are required to be posted on the district website have been posted. In addition, all required school level documents that were due have been completed in eProve. There will be 4 CDIP focus committees: RTI (intervention processes), instructional process, curriculum, and PLC (professional learning communities). A knowledge and skill list for each committee has been established and overviews with purpose and focus for each committee have been created. This information will be presented to principals for feedback. Once updates are made we will share with district staff and begin forming the committees. A 30, 60, 90 day plan has been established to guide the work outlined in the CDIP. All school improvement plans have been reviewed to ensure alignment with the district plan.

Title 1: Guidance for January Title 1 evidence collection and next steps have been established and will be presented to principals at their meeting on Thursday.

MAP testing: The next window for round 2 of MAP testing is scheduled to begin on January 19th. We will be discussing the feasibility of continuing with this date with principals due to us being in the distance learning model along with discussing other possible options for MAP testing.
