

Special Education Board Report

Kathy Bieger

March 27, 2014

1. We are now doing record reviews on random folders to see if we have corrected the systemic problems for our Corrective Action Plan. Two schools are completed, with only minor corrections needed. We will complete our other three schools April 8. Janice Chilton and Julie Truckenmiller are facilitating the process. I feel confident that this record reviews will show the care Carroll County special education teachers take in meeting individual student needs.
2. The Special Education Department is taking representatives from each school to Equipping the Minds training. The conference will be in Danville, April 9-11. Our educators will learn exercises designed to increase our students' capacity for learning.
